

Capital Planning

StrataJazz® is a single, modular, cloud-based platform that provides the “gold standard” for financial planning, analytics, and performance. Our solution offers algorithms and workflow for real-time decision-making, with enterprise governance.

For healthcare leaders, the capital planning process is one often complicated by external forces: everything from building code compliance and aging infrastructure to healthcare reform and new payment structures. Making long-term decisions about investments grows increasingly challenging, as technology and society continue to change, too.

For organizations looking for a more complete, informed capital planning process, StrataJazz® Capital Planning helps provide an end-to-end capital planning process. Boosting efficiency and transparency between your clinical, functional, and financial teams, the StrataJazz® tool can integrate data from all systems within your capital ecosystem.

key features

- **Drives accountability** with multiple approval levels and transparent workflow.
- **Plan current year and long-term facilities renovations** and new construction.
- **Improves transparency** with automated notifications and security management.
- **Reduces capital spend** by identifying group purchasing or bundling opportunities.
- **Empowers negotiations** with your equipment vendors.
- **Complete integration** with project management systems, CMMS, and ERPs.
- **Eliminate manual maintenance** of integrations with supported operational systems.
- **Create a single governance system** for capital.
